

HOWTO : Install Legal Lead Applications

Saturday, April 6, 2024 4:23 PM

Prerequisites

1. Get Latest Version of DOTNET Runtime for Microsoft

Documentation

You can find more details on this install from the [reference guide](#)

Install latest dotnet package using powershell

```
# Run a separate PowerShell process
# because the script calls exit,
# so it will end the current PowerShell session.

$url = 'https://dot.net/v1/dotnet-install.ps1'
$cmd = "[Net.ServicePointManager]::SecurityProtocol = "
$cmd += "[Net.SecurityProtocolType]::Tls12; "
$cmd += "&([scriptblock]::Create((Invoke-WebRequest -UseBasicParsing '$url')))"
$cmd += " -Channel LTS"
&powershell -NoProfile -ExecutionPolicy unrestricted -Command $cmd
```

2. Download Legal Lead Installer

- Documentation

More information on the latest version of legallead.installer in [package home](#)

- Install using the script below

```
$name = 'legallead.installer';
$feed = 'https://www.myget.org/F/fwthompsonjr/api/v3/index.json';
dotnet tool install -g $name --add-source $feed
```

Installation

3. Execute install command from leadcli installed in step 2
Confirm that cli has been installed by running command below.

```
leadcli version
```

Expected output:

```
3.2.0 - legallead.installer
```

4. Install legallead-desktop application

```
leadcli install legallead-desktop
```

After installation the application will open in a new window.
